> *Jyotish, the sacred science of light, illuminates the soul's journey through the canvas of time.*

This report presents the celestial pattern configured at the exact moment of your birth according to the classical Vedic tradition of India. Unlike Western tropical astrology, it utilizes the sidereal zodiac, reflecting the actual astronomical positions of the constellations, and offering profound clarity on dharma (life purpose) and karma.

The natal chart, or Janma Kundali, is fundamentally an instrument of self-knowledge: it illuminates inherent strengths, karmic growth areas, and the chronological timing of major life seasons.
